

ayfie

INSPECTOR for RELATIVITY

Directly integrate text analytics with Relativity®.
Analytics, visual search and review all in one place.
Simple to deploy with seamless data flow.

Words Matter.

Next-generation Text Analytics and Data Exploration

ayfie Inspector, a powerful text analytics engine that indexes, understands and organizes massive amounts of content at lightning speed, now integrates directly with the eDiscovery system of choice for over 150,000 professionals.

Drawing on more than 30 years of research into linguistics and semantics and more than a decade of experience in enterprise search, ayfie Inspector goes beyond “AI” to find and extract meaning from documents just like a human being – only exponentially faster. The platform employs linguistic methods, semantics and local grammars to contextualize and normalize all text in source documents. Other text analytics platforms see tokens; ayfie Inspector identifies meaning.

Analytics, Visual Search and Review in One Place

- Enjoy the industry’s best analytics, visual exploration and predictive coding capabilities without ever leaving the Relativity® review environment
- ayfie accesses and updates the Relativity® database directly, creating a seamless workflow that simplifies data handling, saves time, and reduces the risk of error. With automated installation and full integration, implementing ayfie Inspector for Relativity® is a breeze

Semantic Intelligence Engine That Requires No Training Documents Up-front and Works on Any Size of Data

Bringing Aided Intelligence to the Relativity® Review Environment

- ayfie Inspector makes unstructured content – like email threads, Word documents, PowerPoint slides, PDFs and more – available for in-depth semantic analytics, data extraction and content aggregation
- ayfie Inspector’s hyper-normalization capabilities put all documents and content in statistical relation to each other, extracting entities like people, locations, organizations and times, then providing them as suggestions and drill-down options for further research
- ayfie Inspector makes tangible the value hidden in your unstructured content – accessible directly within Relativity®. The ayfie approach to clustering, categorizing and aggregating documents gives users comprehensive understanding of large content bases

Who Is ayfie?

ayfie provides products for eDiscovery, media, compliance and search across industries and geographies. ayfie’s language-processing technologies are based on more than 30 years of research at several renowned universities. ayfie’s headquarters is located in New York City, with offices in Washington, D.C. and Munich, Germany.
