

fast and seamless integration for the largest data sets

nuix AND RELATIVITY

REVIEW FASTER

In the time it takes other technologies to evaluate how much case data you have, Nuix and Relativity make all relevant evidence available for review. This enables you to meet court, regulator and client deadlines, making fact-based decisions from the outset and maintain a leading edge throughout litigation.

Nuix and Relativity combine to make it easy for you to process, investigate, cull and transfer selected data into Relativity databases for review. Deep integration between Nuix and Relativity eliminates any concern about load file configuration or other compatibility issues.

- **Powered by the Nuix Engine.** Nuix's patented parallel processing engine can index virtually unlimited volumes of unstructured data faster than any other technology.
- **Ingest everything, even the most difficult data.** Nuix indexes the complex data sources everyone else ignores because they are "too hard."
- **Work with data in place and on site.** Nuix applications are highly portable, so you can deploy them behind the firewall without complex installation procedures or expensive software dependencies, and start processing within minutes.
- **More ways to work with your data.** Nuix eDiscovery helps you cull, investigate and cross-reference data using techniques including auto-classification, deduplication, near-duplicate management, integrated optical character recognition, interactive graphics and visual analytics.
- **Deliver consistent results at a lower cost.** The Nuix Director web application enables your most skilled eDiscovery practitioners to codify their knowledge into templates and workflows for others to use. Employees with minimal training can complete difficult eDiscovery tasks and achieve consistent, audited and defensible results.

"We're very excited to partner with Nuix. Nuix is a leader in the eDiscovery space, and their constant focus on innovation makes their technology a great fit for Relativity and our clients."

Andrew Sieja – President and CEO, kCura

"Relativity is a premier eDiscovery platform, and the combination of Relativity and Nuix is a great solution for major litigation service providers."

Eddie Sheehy – CEO, Nuix

Nuix finds and directly indexes the contents of more than 400 file formats and storage containers including:

- Hard drives and flash memory devices
- Forensic images
- File shares
- Mobile devices
- Microsoft Exchange, Lotus Notes and other email databases
- Microsoft SharePoint
- EMC EmailXtender, Symantec Enterprise Vault and other email archives
- Cloud services including Amazon S3 Buckets, Microsoft Office 365 email* and Microsoft SharePoint.

* Available with the Email Archive Examiner option.

ABOUT NUIX

Nuix enables people to make fact-based decisions from unstructured data. The patented Nuix Engine makes small work of large and complex human-generated data sets. Organizations around the world turn to Nuix software when they need fast, accurate answers for digital investigation, cybersecurity, eDiscovery, information governance, email migration, privacy and more.
