

Next level litigation®

Introducing the first collaborative case management platform for litigators.

Case Management & Analysis

The future of litigation is here.

Introducing a revolutionary case management and analysis platform for lawyers. Everchron brings together all of the information you need in a collaborative workspace for your entire team. And it does it in a way that's fast, effective, and intuitive.

Master the facts of your case

Everchron creates a timeline of a case's key documents and data, drawing intelligent connections to witness testimony, facts and issues that reflect and reveal critical information about the case.

Going beyond e-discovery

Everchron helps your team organize, analyze and discuss key information throughout the life of a case, from the complaint to depositions, motions, trial and appeals.

Investigation

Complaint

Document
Discovery

Depositions

Motions

Trial

Appeal

Benefits

- ✓ Trial mindset from the beginning of a case
- ✓ Increased efficiency
- ✓ Improved client communication and access
- ✓ Better internal communication

Chronology

Your chronology just got a whole lot better.

Everchron connects your key documents, facts, and witnesses in a dynamic chronology that is always up to date.

E-discovery finds the needles, we manage them

Everchron takes over where document review tools leave off, allowing you to perform a deeper analysis of your documents, facts and witnesses. Go beyond rote issue tagging and work with your documents in a robust platform built for legal and factual analysis.

Trial mindset from the outset

Easily search through the entire case to uncover a cohesive case story and analyze connections between events, documents, and witnesses. With one click, instantly filter your chronology down from all key documents, to just the hot documents, or down further to any relevant issue or witness.

Build your chronology as a team

Work as a team to categorize, summarize and tie together your key documents. Designed by lawyers to work the way that lawyers actually work, Everchron leverages information that is input into the system so you can more efficiently analyze case-critical information.

Preserve team knowledge

Too often, one or two attorneys on your team are responsible for the facts of the case. Everchron preserves your team's best ideas and work product for everyone's benefit, throughout the life of a case.

Benefits

-  Build your chronology collaboratively
-  Immediate access to key documents
-  Unprecedented transparency for clients

Master File

Say hello to your new master file.

Until now, master files have been unwieldy and tedious to search. Everchron is designed to make reviewing and searching a case's master file faster and easier than ever before.

Instantly find your case documents

Everchron provides an intuitive filing system for all of your case documents - pleadings, motions, discovery, transcripts, correspondence and court orders. You can quickly filter your master file to find exactly what you need without the typical noise in a document management system.

Advanced Viewer

Everchron's advanced viewer allows you to instantly review, download, comment and share your case documents.

Automated with Docket sync

Powered by Docet Alarm, Everchron's Docket Sync feature allows users to sync up their matters with any docket on PACER as well as proceedings before the International Trade Commission, the Patent Trial and Appeal Board, and the Trademark Trials and Appeal Board.

Built for complex litigation

Everchron is built for cases of all sizes including the largest, most complex cases with multiple dockets and numerous parties.

Benefits

-  Instant retrieval of any case document
-  Intuitively organized for litigation
-  Always up-to-date access for clients

Witnesses

We just reinvented the witness file.

Preparing for depositions and witness examinations can be time consuming. Everchron automates the tedious part of witness prep, so you have more time for analyzing, outlining and drafting.

Automatically generated

Witness files are automatically generated and optimized, by connecting individual witnesses with related evidence and case documents.

Advanced analytics

Everchron makes connections between witnesses based on their involvement in the case, their relationships with each other and other pertinent facts and issues.

Unified witness file

Witness files in Everchron link with other key documents, such as filings and depositions, so you get a unified picture of their testimony and relevance to the issues in the case.

Instant binders

Our intelligent system brings together related information and document sets, which can be used for witness preparation and quickly converted into hard copy binders.

Benefits

- ✔ Prepare faster and better for depositions & examinations
- ✔ One-click witness reports and exports
- ✔ Capture how witnesses relate to key issues

Everchron for iPad

Everchron for iPad allows you to access your matters, documents and analysis directly from your iPad.

Mobile access for the global lawyer

Manage your cases from anywhere right from your iPad. Securely review key documents and filings, team analysis, and witness profiles on the go.

Seamless integration with Everchron

Our native iPad app syncs with your Everchron matters on the web, so you can instantly access new documents and the latest updates on your tablet.

No more binders, Redwelds and Bankers Boxes

Cut printing costs and travel light, all while saving the planet. Instead of lugging around binders, folders and boxes that are good for a case or two, carry your lightweight iPad around with the key documents for all of your matters.

Benefits

- ✓ Mobile access to all of your Everchron matters
- ✓ Instantly pull up key documents on your tablet
- ✓ Prep for depos and witness exams on the go

Secure Collaboration

Everchron utilizes bank-grade security, encrypting data and documents in transit and at rest, to ensure secure collaboration.

AES 256 Encryption

Documents, metadata, OCR text, and comments are encrypted at rest and in transit, both at the database and file system level using AES 256 encryption.

Penetration Tested

Our web application and network infrastructure undergoes security audits and testing by an independent security firm to maximize the security of your data.

World Class Protection

Everchron's data is stored in Amazon Web Services' (AWS) world-class, highly secure data centers, staffed 24x7 by trained security guards.

Certified Data Centers

AWS continually manages risk and undergoes recurring assessments to ensure compliance with industry standards.
