

Efficient privilege review

Accelerated privilege review and privilege log creation to save attorney time for review.

Consistent documents

Automated data entry and privilege log version control for consistency across the review workflow.

Privilege review and the creation of a privilege log are time-consuming and inefficient, involving arduous and error-prone data entry. And due to the sensitive nature of the content, this process must be completed by more experienced attorneys, incurring costs that are disproportionate relative to the number of documents being addressed. Further, relying on multiple reviewers to make independent decisions on whether documents contain privilege lends itself to inconsistency and even missing privilege calls.

The Lighthouse PrivSmart application delivers efficiency and consistency for the entire privilege review and privilege log creation workflow.

What is PrivSmart?

PrivSmart is a combination of complementary technologies built to make your privilege workflow more efficient and consistent: Privilege Categorization and Privilege Log.

Privilege Categorization has a user-editable privilege search term list to identify and group potentially privileged documents based on their likelihood to be privileged. These groups can then be assessed and prioritized for further evaluation.

Privilege Log normalizes names based on metadata and generates a log of privileged materials in a matter of minutes. A user-friendly interface allows users to customize and manage their final privilege logs, including managing version control and excluding documents from subsequently generated logs.

The Lighthouse difference

PrivSmart automates the tedious aspects of the privilege review workflow so attorneys can spend their time on important coding and treatment calls – not on data management and entry.

For the last 25 years, Lighthouse has been helping organizations manage the increasingly complex landscape of enterprise data for legal teams, and that experience is reflected in PrivSmart.

FAQs

Is PrivSmart replacing attorney review? No. PrivSmart augments the work of attorneys by handling the time-consuming and tedious manual steps – faster and with more consistency.

Can I use PrivSmart for a complex case? PrivSmart is user-editable and has an easy-to-use interface so users can customize the output to fit their unique cases.

What about security? PrivSmart data is managed with the same high security standards as the rest of the Lighthouse offerings. And Lighthouse has the most advanced security in the industry, hands down.
