

Hyperlinx

Automate the tedious

Hyperlinx is the easiest way to hyperlink documents to Relativity.

Developed by icourts, Hyperlinx is ideal for linking Witness Statements, Case Outlines and Interview Plans to material hosted in Relativity.

Features

- Hyperlink Word document to existing documents in your Relativity workspace
- Produce the Word document with Relativity Control Number hyperlinked
- Produce a PDF version of the Word Document for standardisation
- Option to hyperlink to your Relativity workspace or download the native documents
- Respects and authenticates against user permissions in your workspace
- Generates an easy to read report for review and analysis

Benefits

- Reduce administration time and cost by automatically adding active hyperlinks to documents
- Mitigate human error by automatically hyperlinking Control Number in the word document to corresponding document
- Reduce vulnerabilities in due process and data security by keeping the entire review process within the Relativity environment
- Flexibility to work offline by exporting hyperlinked primary document and all referenced material
- Uphold Relativity environment security with built-in user permissions and validation
- Quickly identify errors with simple to read report
